Intlvac Thin Film Statement on Conflict Minerals

Section 1502 of the Dodd-Frank Wall Street Reform and Consumer Protection Act, passed in July 2010, is an attempt to prevent rebel groups in the Democratic Republic of Congo (DRC) from illegally using profit from the minerals trade to fund their activities. The act requires publicly-traded corporations to report the use of “Conflict Minerals” (specific mineral ores and their derivatives; gold, tantalum, tin and tungsten – abbreviated 3TG) which originate from the DRC or specific adjoining countries in their products.

As a privately held corporation, Intlvac Thin Film is not subject to the Conflict Minerals reporting requirements; however, as a supplier to publicly traded companies, we are committed to helping our customers comply with their reporting requirements.

Like many other manufacturers, Intlvac Thin Film may use some or all of these 3TG minerals in the manufacturing process, as our products require them to function. Intlvac Thin Film does not purchase all of these materials directly from smelters or mines, so we rely on source information provided by our suppliers to confirm our compliance with Dodd-Frank.

Intlvac Thin Film requires suppliers whose products contain 3TG to submit this information to us using the standardized Conflict Minerals Reporting Template (CRMT) that traces the minerals back through the supply chain. Any areas of non-compliance will result in a review of our business relationship with these suppliers.

Based on the information provided by our supply base, Intlvac Thin Film can confirm that our products are in compliance with the Dodd-Frank Conflict Mineral regulations. Intlvac Thin Film will provide updated information as necessary.

Thank you for your continued support.

Dino Deligiannis
